COVID-19 Campus Guidance

Correct Use and Washing of Face Coverings:
COVID-19 spreads mainly from person to person through respiratory droplets produced when an infected person coughs, sneezes, or talks. These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs. A cloth face covering may not protect the wearer, but it may keep the wearer from spreading the virus to others.

When do I wear a face covering?
- Inside any campus building
- In outdoor settings when it is difficult to social distance like walking down speedway

How do I wear a face covering correctly?
1. Wash your hands before handling face covering
2. Place face covering snugly over nose and mouth
3. Breathe normally
4. Keep the covering on your face the entire time you’re in public
5. Don’t put the covering around your neck or up on your forehead
6. Don’t touch the face covering, and, if you do, wash your hands

How do I remove my face covering?
1. To remove face covering, untie from behind head or unloop strings from behind ears
2. Fold the outside corners of the face covering in
3. Be careful not to touch your eyes, nose, and mouth when removing
4. Wash hands after handling face covering

How do I wash a cloth face covering?
- Be sure to wash your cloth face covering after every wear
- You can include your face covering with your regular laundry. Use regular laundry detergent and the warmest appropriate water setting for the cloth used to make the face covering. Use the highest heat setting and leave in the dryer until completely dry.
- By hand using a bleach solution. See instructions here. Lay flat and allow to completely dry. If possible, place the cloth face covering in direct sunlight
